

SLA - Ready

Making Cloud SLAs readily usable in the EU private sector

Getting the European private sector into the cloud comfort zone

Small businesses

Large companies

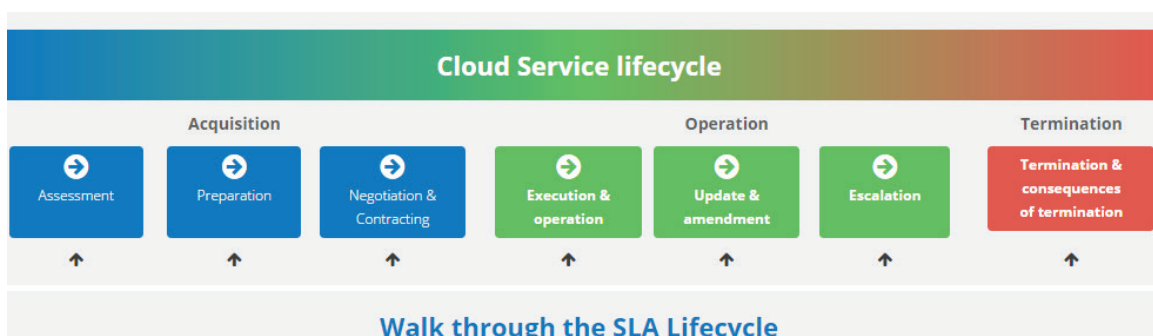

Cloud service providers

-  Answering key questions - Addressing common concerns – Making informed decisions
-  Providing guidance on security, standardisation and certification

A LIFECYCLE APPROACH TO CLOUD SERVICES AND LEVEL AGREEMENTS

Jointly designed by business & market players, security experts and legal advisors

-  SLA-Ready takes businesses through every step of the lifecycle: from evaluation and acquisition through to operation and termination of contract
-  SLA-Ready helps businesses know what to do, what to expect and what to trust every step of the way, whether they are using off-the-shelf services with standard contract terms or have some power to negotiate
-  SLA-Ready also runs webinars to help guide businesses through cloud contracts and service levels, also targeting SMEs and sectors with low uptake

SLA - Ready

Making Cloud SLAs readily usable in the EU private sector

Revitalising the European economy

The European Digital Single Market connects 500 million customers.
The potential gain for the European economy is €15 billion/year.

Opportunities for Europe

Small businesses are the lifeblood of the European economy.
Data analytics and the internet of things are bringing new market opportunities

Businesses of all sizes only realise the benefits of the cloud when they truly understand and trust it

CLIMBING THE CLOUD CURVE

-  SLA-Ready increases both understanding and acceptance of top barriers to cloud adoption.
-  SLA-Ready helps businesses get to grips with complex legal and technical terms.
-  SLA-Ready helps businesses compare, define and monitor security levels.
-  SLA-Ready helps in negotiating specific needs.

Companies can carefully plan their journey to the cloud, growing their business with new services and applications.

Start your journey with SLA-Ready and use it every time you adopt a new service
